I am a Software Engineer. I have over 4 years of experience working as a Full Stack Software Engineer in the industry, specializing in both Microservice and Monolithic architectures.

Skills

Languages: JavaScript, Java, Kotlin, NodeJS

Frameworks & Libraries: Typescript, ReactJS, Springboot, NestJS, NextJS, ExpressJS, Fastify, MaterialUI

Databases: MySQL, PostgreSQL, MongoDB, DocumentDB

Queues: RabbitMQ, Kafka, AWS SQS, Redis

Cloud Services: AWS Route 53, AWS EC2, AWS S3, AWS Glue, AWS RDS

CI-CD & Observability: ArgoCD, Github Actions, Grafana, Loki

Experience

Senior Software Engineer - II, Bazaar Technologies – Karachi, Pakistan April 2023 – Present

- Contributed to the company's transition from the B2B to the B2C business model, expanding customer reach and market presence.
- Developed new pricing models to attract B2C customers, resulting in increased sales conversion.
- Collaborated with the core team to revamp the catalog system, resolving business blockers by implementing multi-image support, enhanced visibility controls, and user-friendly UI dashboards.
- Introduced voucher functionality to address a top customer request identified in surveys.
- Implemented cost optimization measures by rightsizing resource allocation, reducing monthly vertical costs from \$360 to \$210 (42% reduction).
- Maintained 100% test coverage through comprehensive unit and integration testing in an Extreme Programming environment.

Full Stack Software Engineer, Bykea – Karachi, Pakistan April 2022 – March 2023

- Enhanced the Delivery vertical by adding parcel insurance that provided customers with peace of mind.
- Served on the core team that led development of a bidding system for the Ride-hailing vertical, enabling drivers and customers to find optimal offers.
- Participated in initiatives to improve system stability by introducing unit testing.
- Developed high-traffic backend services handling millions of requests daily.

Full Stack Software Engineer, Salsoft Technologies – Karachi, Pakistan March 2021 – April 2022

- Developed multiple full-stack applications from design through deployment for diverse client projects.
- Collaborated with cross-functional teams including project managers, clients, and mobile developers in a fast-paced agency environment.
- Built backend services and APIs to support mobile applications across iOS and Android platforms.

Full Stack Software Engineer, Switcheroo.ie – Dublin, Ireland (Remote) July 2020 – February 2021

- Drove full-stack development at an early-stage startup, building core application modules from scratch.
- Developed customer-requested mortgage calculation and comparison features for the Irish market.
- Implemented end-to-end data encryption across frontend and backend services to ensure secure data transmission.
- Redesigned the user interface using Material UI, creating responsive and intuitive components that improved user experience.

Education

University of Karachi – BS in Software Engineering with 3.23 GPA

2017 - 2020
